About me

Computer Technology student specializing in Embedded Systems and Mobile (SEM) at ISET Kasserine. Passionate about embedded systems, IoT, and software development, with hands-on experience through academic projects, technical training, and internships. Seeking to develop my technical and personal skills through an international academic experience.

Education & Training

ESP32 avec Micropython Training Program — 15/01/2026

TEAM S.A+ ACADEMY | tunis, Tunisia

- Developed embedded-system projects using ESP32 and MicroPython, including a home temperature monitoring and alarm system.
- Designed and implemented a smart parking system using ESP32, MicroPython, sensors, and Firebase to monitor parking availability and control the entrance barrier.
- Integrated and tested sensors, hardware components, software, and connectivity to develop practical IoT solutions.

Internship – Embedded Systems — 05/01/2026 - 10/02/2026

STBO, STE TUNISIENNE DES BOISSONS DE L'OUEST | Kasserine, Tunisia

- Analyzed a real-world technical issue within the company and proposed an embedded-systems solution.
- Designed and developed a virtual prototype using Wokwi and ESP32.
- Programmed the ESP32 using MicroPython to implement the proposed solution.
- Tested and validated the prototype through simulation.
- Presented and delivered the prototype to the company as a proof of concept.

Bachelor's Degree in Information technology - Embedded Systems and Mobile — 15/09/2024 - Current

Kasserine Higher Institute Of Technological Studies | Kasserine, Tunisia

- Developed various academic projects combining software development, embedded systems, and hardware integration.
- Designed and implemented database solutions using both SQL and NoSQL technologies.
- Developed full-stack software applications, including backend systems using Node.js, Express.js, and MongoDB.
- Integrated software applications with embedded hardware to create complete hardware–software solutions.
- Programmed and controlled microcontrollers including ESP32 and Arduino using C++.
- Developed a line-following robot, integrating sensors, microcontroller programming, and hardware components to enable autonomous navigation.
- Implemented an obstacle-detection system using sensors and microcontrollers to enable real-time environmental detection and response.
- Gained introductory experience with Raspberry Pi and its use within embedded-system projects.

Field(s) of study: Electronics and automation , Database and network design and administration , Software and applications development and analysis | **Website:** http://www.isetks.rnu.tn/fr/

Introductory Internship — 05/01/2025 - 10/02/2025

Tunisie Telecom | Kasserine, Tunisia

- Gained practical exposure to telecommunications networks, Internet infrastructure, bandwidth testing, customer feedback management, and database operations.

Skills

Technical skills:

- embedded systems
- Python (computer programming)
- database management systems
- Programming of Microcontrollers (Arduino, ESP8266)
- C++
- Internet of Things

Soft skills:

- communication
- teamwork principles
- problem-solving with digital tools

Language Skills

- **Arabic**: Mother tongue
- **French**
- **English**
- **German**
